-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. The indicated allowability of claims 1-76 is withdrawn in view of the newly discovered reference(s) to Heismann et al (Electronics Letters 5/87 article). Rejections based on the newly cited reference(s) follow.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-35, 66-68, 72-76 are rejected under 35 U.S.C. 102(b) as being anticipated by Heismann et al (Electronics Letters 5/21/1987 article). Heismann et al clearly discloses the claimed invention of a method of synthesizing an electric field. As claimed by applicant Heismann et al teaches in figures 1 and 2 a plurality (two) of voltage levels (VT, VMC) to be generated at a corresponding plurality (two) of groups of locations in space and applying the plurality (two) of voltage levels (VT, VMC) at a corresponding plurality of groups of locations, the plurality (two) of groups of electrodes being electrically insulated from all (each) other.

Re the birefringent material, see abstract for mention of the birefringent waveguide.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 36-65, 69-71 are rejected under 35 U.S.C. 103(a) as being unpatentable over Heismann et al. Heismann et al has been discussed above except for the digital storage elements. It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate into Heismann et al the digital storage elements, since it has been held that broadly providing a mechanical or automatic means to replace manual activity which has accomplished the same result involves only routine skill in the art. *In re Venner*, 120 USPQ 192.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Quyen P. Leung whose telephone number is (571)272-1943. The examiner can normally be reached on 8-4:30, M-F.
